Aug 2021 - May 2023 | Buffalo, NY

Cognitive Science, Concentration in Computational Modeling

Computer Science Minor, Mathematics Minor

**GPA:** 3.638

## PROJECTS

### National Fuel Company Portal - Case Study

Figma | Adobe XD

While interning at National Fuel, I developed and designed a complete restructure of the company portal. Using Figma, I created a fully functional prototype for employees to try out.

### Amazon Prime Website Redesign - Case Study

Figma | Sketch

Using Figma and Sketch, Developed high-fidelity wireframes, clickable prototypes, and conducted usability tests. Overall gave the website a modern look through cleaner design and sharper functionality.

### Recommendation - Programming / Code

Scala

Using Scala, implemented a program where given a customers purchase history, what items should we recommend to future customers and current customers.
