Education

University at Buffalo   Buffalo, NY
Cognitive Science, Computational Modeling. 3.522   2019-2023
Computer Science, Minor
Relevant Coursework: Human Factors in System Design, Human-Computer Interaction, Computational Linguistics, Deep Learning for Computer Science

Frederick Law Olmsted   Buffalo, NY
Advanced Regents Diploma, 3.458   2016-2019

Experience

National Fuel   Buffalo, NY
Web Developer Intern   Jun 2021– Current
- Developed and maintained the back-end of the employee portal through major and minor bug-fixes, addition of content, and update of current content.
- Designed and modeled a new interface for the employee portal through Figma.
- Pitched design solutions to create a better navigation and collaboration for our employees.

Projects

Employee Portal Redesign   2021
Design   National Fuel
- Using Figma, developed high-fidelity wireframes, clickable prototypes, and conducted usability tests for an employee portal.
- Organized and resolved a lot of the issues concerning the employee using the website.
- Participated in team-building, and strategized design-thinking exercises using research to solve complex design challenges.

Recommendation
Programming   2020
- Using Scala and JavaScript, implemented a program where given a customer purchase history, what items should be recommended to future customers.
- Programmed a GUI to conduct testing on how accurate the recommender was.

Amazon Website Redesign
Deign / Case Study   2020
- Using Figma, gave Amazon's prime video website a fresh and modern look.
- Solved multiple design issues the user faces on a daily basis.
- Conducted user personas and constructed user stories.
- Created and designed multiple prototypes along with wireframes.
